

INTERIOR DESIGN PROCESS

TRANSFORM YOUR HOME WITH INTERIOR DESIGN

Whether you are completing a renovation, extension or new build, either with our building design service, or through someone else, or you simply need to give your home a more modern feel, we can help you create a personalised interior style for your home that will compliment your home, your proposed design, and your own personal tastes, creating a home environment that you will simply love!

Our Interior Design service combines choosing the right finishes and fixtures, avoiding the seemingly endless running around and hours upon hours of your time, showing you 3D views so you can visualise the space with the selected finishes, with detailed layout drawings that will provide all the necessary information to builders and tradies, making their life easier on site and avoiding a whole lot of questions for you along the way! Builders really appreciate the level of detail and it leads to a better end result for your home.

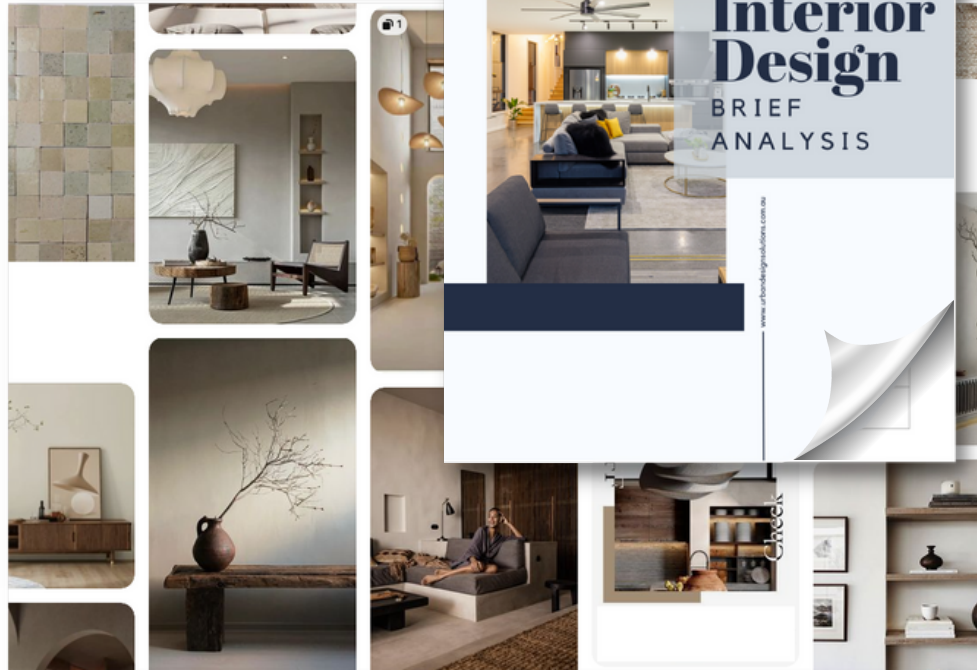

It's your choice, our service is completely customisable to your needs, whether it is just selections, just detailing, or just certain rooms in your home, we can tailor the service to your specific situation.

INTERIOR DESIGN PROCESS

STEP 1.

INSPIRATION IMAGES
& INTERIOR DESIGN
BRIEF ANALYSIS

We ask you to provide us with some photos as inspiration, helping us to understand your own personal style. We meet to discuss your preferences and ask lots of questions on both style and functionality, to ensure we have a clear understanding of your vision.

STEP 2.

SELECTION OF FINISHES & CONCEPT BOARDS

We undertake preliminary finishes selections and prepare concept boards for each of the areas. Once prepared, we have a round table discussion allowing clients to view samples and further refine the selections. All changes discussed during this meeting are completed and emailed to clients for their approval and signoff.

STEP 3. SCHEDULE OF FINISHES & DETAILED WORKING DRAWINGS

SH-02 INTERNAL FINISHES SCHEDULE

URBAN DESIGN SOLUTIONS

Issue: A
Date: 24/7/2023
